Hi there! I am a full-stack developer and a Javascript expert. I have been developing professionally for more than seven years. One of my best qualities is being a team player or a team leader and following the code standards so that other developers can understand and work with me effortlessly.

## SKILLS

### TOP SKILLS

React JS  
Next JS / Remix JS  
Astro JS / QWIK JS  
Node JS  
Prisma JS / Express JS  
NO SQL / SQL  
GraphQL  
Rest API  
Web3 JS / Ethers JS

### LANGUAGES

JavaScript  
TypeScript  
GraphQL  
HTML  
CSS  
SCSS / LESS  
Solidity  
SQL

### DATABASE

MySQL  
PostgreSQL  
MongoDB  
DynamoDB  
Redis

### FRAMEWORK / LIBRARIES

Redux  
Styled Component  
Bootstrap / Tailwind  
Material UI  
Apollo GraphQL  
Sequelize ORM  
Mongoose ODM  
Jest / Mocha / Chai / Vitest  
Storybook  
Cypress.IO  
Webpack / Babel  
Elastic Search  
Socket.IO  
HandleBar JS / EJS  
Solidity / ERC Tokens

### PLATFORM / TOOLS / OTHERS

Docker  
AWS  
Serverless Computing  
NPM / YARN / NVM / GIT  
Truffle / Hardhat

## EXPERIENCE

### CONDE NAST TECHNOLOGY LAB

Bangalore, Karnataka, India

SOFTWARE ENGINEER-I

JUNE 2021 - PRESENT

#### Smart Component

Developing a react component has the flexibility to choose a layout for each screen mobile, tablet, and desktop. The layout is a set of configurations passed based on the side admin panel configuration. The layout decides the design and element arrangement on the requirements.

#### TNY Quiz/Name Drop

Developing a quiz application for The New Yorker brand as a software engineer in a team. By converting the Figma design to a functional react component which is successfully moved to the production now.

#### TNY Article Inline/Footer Newsletter

As promoting the user newsletter subscription for the New Yorker we developed an article inline and footer newsletter subscription form and an inline toggle subscription unit for the logged-in users.

#### TNY Home Page Signalling

Enhancing the user experience by customizing the home page and article page of The New Yorker by adding/updating the audio and other feature elements.

#### TNY Email Newsletter

Developing some email templates called newsletters for The New Yorker, which is a daily-based/weekly-based email service for the subscribers based on the user subscription. We generate these newsletters with a simple templating language like handlebar JS partials.

#### Tech Stack

React JS, GraphQL, AWS, Styled Component, SCSS, CSS, Handlebars, Redux, Storybook, Cypress, Sailthru, Jest, Vitest

### HTC GLOBAL SERVICES

Chennai, Tamil Nadu, India

SOFTWARE DEVELOPER

FEB 2020 - JUNE 2021

#### American University of Antigua - Manipal Education

Developing microservice for an web applications as per the requirement for an educational website for institutes by the Manipal Education Groups.

#### Lead Management in Serverless Architecture

Validating and transforming a large amount of data before storing it in a DB with the AWS serverless architecture and dynamo DB.

#### Tech Stack

TypeScript, Express JS, Sequelize ORM, Mongoose ODM, SCSS, AWS SQS, Dynamo DB, AWS Serverless, EC2, Elastic Search, Docker

## DEVELOP SCRIPT LLC

Chennai, Tamil Nadu, India

### NODE JS DEVELOPER

DEC 2018 - JAN 2020

#### Mazzay - Penny Auction website

Developing an auction-based e-commerce website and mobile application API provider. We integrated third-party libraries such as payment gateways, shipping services, and notifications. Also, the real-time data binding between the mobile application, frontend, and backend with socket.io.

#### Sothebid - E commerce based Auction website

Developing an auction-based mobile selling website for a European client within less time including lots of functionalities like the bidding, admin panel, and social login.

#### PreRio - Forward Auction website

Developing a pre-real estate-owned website with multiple features like multistage forms for capturing the property details and functionalities for the buyer and seller.

#### SlotCycle - Forward Auction website

Integrating the shipping, multiple language support, and stripe payment gateway for a website that is a casino or gaming operation selling company.

#### Tech Stack

React JS, Express JS, Handlebar JS, EJS, AWS RDS, Redux, Socket.IO, Redis Pub/Sub, Async waterfall, MySQL

## SELSUN TECHNOLOGIES

Chennai, Tamil Nadu, India

### SOFTWARE TRAINEE

DEC 2017 - NOV 2018

#### Round Bar Stock management

Enhancing OpenCV image processing algorithmic programs for semi-device equipment and assessing and installing vision system operation particularities. Working with a team for developing various projects with limited time to achieve the customer requirements.

#### Tech Stack

C++, Python, OpenCV

## CONTRIBUTIONS

## THREADO

Bangalore, Karnataka, India

### FRONTEND ENGINEER

NOV 2021 - JAN 2022

Building a community management app with a small team of 5-6 developers. As a frontend developer, I helped them to finish and roll out some features/pages in the Typescript codebase.

#### Tech Stack

TypeScript, Next JS, React JS, Styled Component, Material UI, Redux

+91 9629180060 

SOFTWARE ENGINEER

FRONT-END/BACK-END DEVELOPER

## ORIGIN PROTOCOL

San Francisco, California, US

### FRONTEND ENGINEER

DEC 2020 - FEB 2021

Worked for the best open source company that makes a decentralized application. They use the Ethereum blockchain for data storage and smart contracts for their app logic. As a frontend developer worked on the functional enhancements with react and interaction with MetaMask using web3js.

#### Tech Stack

TypeScript, Express JS, Lerna JS, GraphQL, Solidity, Styled Component, Web3 JS, Python Flask, Mocha, Chai

## COVER

As an enthusiastic and dedicated professional, I am eager to collaborate with an extraordinary team and further enhance my skills in a dynamic and innovative environment.

Throughout my journey as a developer, which spans over seven years, I have continually pursued my passion for learning and self-improvement. My initial exposure to programming began during my school days, where I discovered my love for coding through self-learning, blogging, and freelancing. Since then, I have consistently pursued opportunities to grow and expand my knowledge.

Over the past seven years, I have honed my skills as a full-stack developer, successfully developing and launching highly responsive websites across diverse domains. I have worked on projects centered around auction systems, finance applications, decentralized platforms, education portals, e-commerce solutions, and mass media concepts. Leveraging advanced technologies prevalent in the market, I have consistently delivered customized solutions that not only meet client expectations but also adhere to project milestones in fast-paced, deadline-driven environments.

Beyond the technical aspect of my work, I place great emphasis on the code's readability and maintainability. I believe in writing clean, well-structured code that is easily comprehensible for fellow developers. By prioritizing transparency and collaboration, I ensure a seamless transition for any developer who takes over the project after me. Honesty and sincerity are values that I hold dear in every aspect of my work, fostering trust and effective teamwork.

Given the opportunity, I would be delighted to provide further insight into my technical abilities and personal attributes that align with the values and goals of Company. I am confident that my passion for learning, strong work ethic, and commitment to excellence would make me a valuable asset to your team.

I would welcome any chance to provide further insight into my technical abilities and personal attributes in the future.
